

Could Your Team Use a Tune-Up?

If your team isn't running at peak performance, results are going to suffer.

The Whole Brain® Team Dashboard:
Make The Team's Productivity a Team Effort

The Whole Brain® Team Dashboard will help your teams evaluate what they are focusing on and what they may be missing, all from a Whole Brain® perspective.

An easy-to-implement diagnostic, the Whole Brain® Team Dashboard allows you to quickly evaluate and analyze team members' perceptions so you can define and clarify desired outcomes and objectives. With the ability to explore future opportunities and the implications of the tasks the team will need to carry out going forward, it's a perfect tool for making sure everyone is geared up and ready for what's ahead.

Getting On Track: A Quick Diagnostic That Generates Powerful Discussion

- 10-minute, 37-question diagnostic evaluating administered by an HBDI® Practitioner.
- Reveals individual perspectives about the team's focus in each of four Whole Brain® areas that contribute to team effectiveness.
- Encourages thinkers to consider the team's strengths and biggest challenge.
- Accompanying workshop, facilitated by the Practitioner, allows for discussion of results.
- Can be repeated throughout the team building process to uncover and compare shifts in team focus.
- Complements discussions and development activities involving the HBDI® Team Profile (does not replace the HBDI® Team Profile).

What Kind of Teams Would Benefit?

- *Functional teams*
- *Cross-departmental teams and taskforces*
- *Corporate leadership teams challenged by a big problem*
- *Working teams that are part of a HiPo development program*
- *Business school case teams*
- *Your team!*
